Finnish Right to Work (RP) | Finland Category B Driving License

PROFESSIONAL PROFILE

System Engineer with 15+ years in IT infrastructure, data center operations, telecommunications and electrical/power systems, including 10+ years supporting mission-critical oil & gas sites in the UAE. Hands-on with VMware, Cisco networking, NetApp storage, structured cabling, UPS/ATS/battery systems and CCTV/access control. Based in Vaasa, Finland, seeking Datacenter Technician, System Engineer, Infrastructure Engineer and CCTV/Electrical Technician roles.

CORE SKILLS

- **Virtualization:** VMware vSphere/ESXi, vCenter, vMotion, DRS, HA clusters, HPE SimpliVity hyper-converged
- **Networking:** Cisco Catalyst/Nexus switches, ISR routers, VLAN/switching, routing protocols (OSPF, BGP, EIGRP), FortiGate firewalls
- **Storage & Backup:** NetApp FAS 8200/8300 (ONTAP Cluster), Veeam Backup & Replication, Huawei OceanProtect, Acronis
- **Data Center Operations:** server racking, structured cabling & fibre patching, rack elevation planning, hot/cold aisle cooling, UPS/power, hardware fault diagnostics
- **Physical Security:** CCTV integration (Axis, Nextiva, Moxa, IP cameras), Lenel & Assa Abloy CLIQ access control systems
- **Systems:** Windows Server (2008/2012/2016), Active Directory, DNS/DHCP; Linux (Ubuntu): CLI, SSH, Netplan, systemd, diagnostics (home lab)
- **Electrical & Power Systems:** 3-phase power distribution and neutral systems, amperage/resistance/impedance measurement, distribution switchgear troubleshooting, ATS panels, UPS systems
- **Tools:** vSphere Client, ManageEngine OpManager, mRemoteNG, Wireshark, TeraTerm, PuTTY, OTDR, FileZilla, TFTP

PROFESSIONAL EXPERIENCE

System Engineer — Etimad Strategic Security Solutions (ESSS)

Abu Dhabi, UAE | Client: CICPA Onshore Sites (SAN, Sahil, Rumaitha, Al Nouf, Asab, Shah, Buhasa, Habshan, Al Mirfa), oil & gas critical infrastructure | Feb 2017 – Jun 2026

- Deployment of data center infrastructure: server racking, structured cabling, fibre patching, switch installation, and power distribution
- Staged, tested and commissioned servers, switches and network equipment; carried out preventive maintenance, fault isolation and corrective actions across the hardware lifecycle
- Administered VMware vSphere environments (ESXi hosts, vCenter, HA clusters, vMotion, DRS) and HPE SimpliVity DL380/DL360 Gen10 hyper-converged clusters
- Managed Windows Server, Active Directory, DNS/DHCP, and SQL Server Management Studio across the site environment
- Diagnosed and replaced server hardware components (PCIe cards, NICs, transceivers, storage controllers, RAID cards, GPU cards, PSUs, RAM, fans, chassis, battery cells) and performed full server swaps for board-level failures
- Administered NetApp FAS 8200/8300 storage (ONTAP Cluster) and FC/FCoE/iSCSI architectures
- Configured and troubleshot Cisco Nexus, Catalyst 9500/9300/9200, and IE3100/IE3300 industrial switches, plus fibre optics and SFP/SFP+ transceivers; resolved fiber link faults via VFL testing and coordinated splicing with vendors
- Administered FortiGate 3810A/1101E firewalls: security policies, routing, NAT, and traffic monitoring
- Ran backup & disaster recovery operations using Veeam Backup & Replication, Huawei OceanProtect, HP Tape Libraries, and Acronis
- Integrated CCTV and physical security systems: Axis/Nextiva/Moxa IP cameras, SR15 radar, and access control hardware; monitored data center cooling and airflow to maintain safe operating temperatures
- Coordinated with OEM vendors and suppliers on equipment delivery, replacements, and support; maintained hardware/spares inventory and asset records
- Supervised a full data center migration end-to-end, reporting progress daily from planning through post-migration testing

Selected Projects:

- Nov–Dec 2023: Deployment/replacement of switches in data centers & 5-rack shelters at Asab Site; configured Cisco Catalyst C9500-48Y4C-A, C9300L-48P-4X-E, C9300-24S-E, and 6x IE3100 switches across Gasco facilities
- Oct–Nov 2024: Configured and deployed 69 IE-3300 industrial switches at Asab Site and 16 at Shah Site
- Feb–Mar 2024: Configured and deployed 32 Axis IP cameras (P1455-LE, Q1788-LE) at Shah Site

Acting Senior Technician — Etimad Holding – Al Fahad Security Systems
Abu Dhabi Emirate, UAE | Client: CICPA Onshore Sites | Feb 2016 – Feb 2017

- Delivered comprehensive hardware and IT support across Etimad group companies (Al Fahad VIA and Al Masar), ensuring reliable operations at critical CICPA Onshore Sites
- Resolved Smart Fence system faults, workstation and power issues, and maintained CCTV fixed and PTZ cameras; deployed long-range FLIR and thermal cameras, perimeter intrusion detection systems, Smart Fence, and access control solutions
- Conducted daily system checks, fault diagnosis, and rectification activities while maintaining strict SLA compliance through 24/7 on-demand response to system failures
- Managed incident reporting, logistics, materials, subcontractor coordination, and client relations
- Monitored and maintained network and field devices via Wisdom software, OP-Manager, Wireshark, and CMclient; performed daily checks, network device and VM backups, and storage system supervision
- Restored full datacenter functionality during complete system shutdowns caused by power failures
- Served as Permit to Work (PTW) signatory for HSE-critical tasks including tower climbing, rope rescue, and lifting operations

Electrical & power systems support:

- Fixed electrical faults across power and utility equipment powering critical site infrastructure, applying strong working knowledge of 3-phase power and neutral systems, amperage, resistance, and impedance
- Maintained and reported on solar panels, battery banks, ATS panels, UPS systems, and other power equipment; troubleshot power failures inside distribution switchgear, critical loads, and UPS systems
- Produced reports on battery impedance, charging/discharging voltages, and solar string voltage and current measurements

IT Coordinator / Engineer — Haward Technology Middle East
Abu Dhabi, UAE | Oct 2013 – Jun 2015

- Provided daily computer hardware/software support; troubleshot networking issues, cabling, and NIC faults
- Maintained IT inventory (laptops, projectors, speakers) and managed issuance/return of equipment for course delivery

Production Operative — Landis + Gyr Ltd
Stockport, UK | Aug 2011 – May 2013

- Performed gas meter assembly, leakage testing, EEPROM testing, and software upgrades across production and refurbishment lines

Team Leader / Field Engineer — Wateen Telecom Ltd
Islamabad, Pakistan | Apr 2009 – Dec 2010

- Led Level 1–3 support for corporate and consumer complaints (WiMAX, DVB, Fibre) across Jhelum City, ensuring 24x7 network availability KPIs
- Troubleshot microwave links, SFP modules, fibre, and AC/DC power issues; conducted RF test drives (RSSI, CINR, modulation)

Associate Engineer — 4B Gentel International (Pvt) Ltd
Jhelum, Pakistan | May 2008 – Dec 2010

- Monitored and maintained LDI systems (power, DIUs, DPLCs, DDF, routers); operated cable patching and E1 circuits

IT/Engineering Technician — Callmate Telips Telecom (Pvt) Ltd
Jhelum, Pakistan | Nov 2004 – Jan 2008

- Monitored and troubleshot LDI systems, routers, gateways, and LAN/WAN; maintained pay-phone and VoIP infrastructure

PERSONAL PROJECTS

Linux Infrastructure & Virtualization Lab — Personal Project
Built and administered a 3-node Ubuntu Linux infrastructure lab using Oracle VirtualBox to develop hands-on Linux system administration and virtualization skills.

- Designed a virtual network using separate NAT/internet and Host-Only networks for management and inter-node communication
- Configured static IPv4 addressing and network interfaces using Ubuntu Netplan
- Configured and managed OpenSSH for secure remote administration and server-to-server connectivity
- Practiced Linux service management, networking, routing, connectivity troubleshooting, and system diagnostics
- Cloned Linux virtual machines and regenerated unique SSH host keys to maintain separate server identities
- Performed hands-on administration using Linux CLI tools including ip, ping, ss, ssh, systemctl, journalctl, df, and free
- Troubleshot network connectivity, SSH access, interface configuration, and VM communication issues

PROFESSIONAL TRAINING & CERTIFICATIONS

- HCIA-Cloud Computing (CORVIT, 2025)
- Assa Abloy CLIQ Local Manager System Training (2024)
- CCNA Training – Cisco (2024)
- HCIA-Datacom, HCIA-Security, HCIA-Storage (CORVIT, 2024)
- H0LP9S: HPE SimpliVity System Administration (Hewlett Packard Enterprise, 2023)
- NetApp ONTAP Cluster Administration & Troubleshooting (CATSP, 2023)
- PTW Training (2018, 2021); WMS (2021); TRAKS Pro (2016, 2019, 2023); IPAF (2017)
- Edexcel BTEC Level 2 Award (Specialist 4-7) in Door Supervision (QCF)
- SIA Door Supervisor Licence (UK, 2011–2014)

EDUCATION

- B-Tech (Hons), Electronics — Preston University, Islamabad, Pakistan (2011)
- B-Tech (Pass), Electronics — Preston University, Islamabad, Pakistan (2009)
- BSc, Mathematics & Physics — University of the Punjab, Lahore, Pakistan (2007)
- Diploma, Computer Hardware & Software — Ministry of Science and Technology, Islamabad, Pakistan (2002)
- Diploma of Associate Engineering, Electronics — PBTE, Lahore, Pakistan (2001)

LANGUAGES

- English (IELTS Overall Band 6.0, British Council – General Training, Dec 2025), Urdu, Punjabi
- Arabic (Read/Write); Finnish & Swedish (currently learning)
